

Muhamad Assem Ahmed

Lab 20

Part A

LAB 20 — Lab ID: 27 | MIN_GPA_LAB = 2.5 | MAX_YEAR_LAB = 2

- (a) StudentsController's two Create methods can share a name because MVC choose by [HttpGet]/[HttpPost] attributes at the action selection stage the framework picks the right overload before it ever needs a unique method name A Razor Pages class has no action selector handlers are located by reflecting over method names for the [Async] pattern
- (b) Because Student is a property, it's visible to every handler on the page not just the one it was declared in and to the .cshtml view via Model.Student
- (c) Returning the view/page after a successful POST still leaves the browser sitting on a POST request in its history Pressing F5 re-submits that exact request

Part B

anew form needs no data loaded from the database

Part D

Muhamad Assem with id 6 and year 2 and Gpa 2.5

A)

StudentPortalWeb Home Privacy

Muhamad Assem was added the Razor Pages way

Student Roster

The same rows as [/students](#) served by a razor page at [/Roster](#) No Controller , no Route Entry , no new query

+ Add a Student

Id	Full Name	Year	GPA
1	Kareem Fouad	4	3.20 - Second
5	Muhamad Assem	4	3.70 - First
6	Muhamad Assem	2	2.50 - Pass
2	Nada Samir	1	3.60 - First
3	Omar Hesham	3	2.80 - Pass
4	Yara Adel	2	3.50 - First

[roster in the MVC way](#)

Activate Windows

B) No extra one submitted

StudentPortalWeb Home Privacy

Add Student

- GPA must be at least 2.5 for this intake.

FullName

YearOfStudy

0

Gpa

0

GPA must be at least 2.5 for this intake.

[Save](#) [Back to Roster](#)

Student never gets bound from the post it stays the default `new()` (null FullName, YearOfStudy = 0, Gpa = 0.0). Since Student was never part of model binding it's also never part of automatic validation
